Online learning

This exciting online training programme brings together doctors, nurses, virologists and other healthcare workers linked through the worldwide Penta ID Network. Led by our expert faculty team, our aim is to build the professional capacity of healthcare professionals in both high-income and resource-limited settings around the globe.

The freshly updated course will address specific knowledge gaps to establish best practices for the care and management of children, adolescents and pregnant people living with viral hepatitis. Our goal is to provide timely and targeted support amid the ongoing global response concerning treatment and prevention of both acute and chronic paediatric hepatitis.

What to expect

- 9 interactive and in-depth online modules
- Innovative e-learning methods
- Live 'Ask the Expert' Q&A webinar sessions
- Tutoring from leading frontline experts in the field
- Extensive variety of supplementary learning resources
- Unique networking opportunities!

“
Incredible modules and online resources. I will use the links provided through PentaTr@ining for the rest of my career!
- Previous course delegate
